

PHANTOM 500

CARATTERISTICHE

Lunghezza	15 m
Larghezza	4.5 m
Motori	3 x 350
Velocità massima	45
Anno di costruzione	2016
Equipaggio	1

SISTEMAZIONE

Configurazione cabine	1 cabin
N. di bagni	1
N. max di ospiti in crociera	30

DESCRIZIONE

PHANTOM 500

The new PHANTOM 500, with its 15 m in length, represents SEA WATER's new flagship and a new landmark for our shipyard in terms of design and technology. The most recent addition to our range and now SEA WATER's leading RIB, the PHANTOM 500 can be supplied in an open configuration, with an enormous sun-pad and an array of spacious lockers for use as a day cruiser, tender or chase boat or with a spacious bow cabin and a custom maxi T-Top for comfortable cruising. The PHANTOM 500 can house either twin inboard diesel engines with sterndrives or other propulsion drives or triple and even quadruple outboard engines and together with one of the new Joystick piloting packages, available both with inboard or outboard engine configurations and/or a bow thruster, manoeuvrability and ease-of-use become unmatched. Deck layout has once again been designed according to our SEA WATER philosophy: a simple and functional layout, where everything is in the right place and where beauty means simplicity. Starting from the immense bow Sun pad with a series of huge underlying storage lockers or, in the case of the cabin model, the large bow cabin with overlying sun-pad protected by two generous stainless steel grab rails and where the large stainless steel bow mooring pole gives the boat that unmistakable SEA WATER look that you can always recognise. Wide and comfortable passageways lead towards the Stern and, at the centre of the boat, to a large steering helm that houses a spacious and complete bathroom. The driver's position and the visibility from the helm are excellent and designed to make the PHANTOM 500 easy to drive and always safe. The dashboard is able to house all the instruments and all other fittings necessary for comfortable, safe and fun pleasure boating. Further astern,

beneath the protection of the big T-top or the sun cover, the boat's living area offers spacious and comfortable divans, a large table and an even larger refrigerator. The Stern is also home to a gigantic sun-pad and other passageways lead to an immense bathing platform (on the inboard model) with an elegant and practical hidden boarding ladder or generous side boarding ladders on the outboard model.
